The Audit Resource Center

Free Help from Audit Experts + Audit & Compliance Blog + Online Audit Resources

Who We Are

Our experienced and knowledgeable Audit Resource Center team works with you to provide support during one of the most crucial times of the year: **your annual audit**. Our goal is to help schools nationwide reinforce internal controls and procedures to simplify and enable complete enrollment reporting compliance. **The Audit Resource Center is free and available year round.**

What We Do

Since 2006, we have worked with schools to address compliance issues that arise from the annual audit visit and help resolve negative findings. We also offer online resources that offer useful information on preparing and responding to an audit. theclearinghouse.help/audit

How We Work

We are available to answer your questions year round before, during, or after an audit, including:

- How do I know a student's reported enrollment was reported in a timely fashion?
- How can a school policy or enrollment reporting practice impact our enrollment reporting for student aid compliance?
- What is the data flow process from my school to the Clearinghouse and from the Clearinghouse to NSLDS?

Once you contact us, we conduct thorough research on your audit inquiry and work with you directly, providing guidance along with information from the latest regulations and resources that you can give to your auditor.

How We Help

Each year, the Audit Resource Center helps **reduce or entirely eliminate preliminary audit findings for schools presented with negative audit findings.**
