

EnrollmentVerify is a service that provides instant enrollment verifications for student service providers (e.g., credit grantors, travel companies, computer hardware and software resellers, etc.).

### Benefits of EnrollmentVerify

- Eases administrative burdens by allowing the Clearinghouse to act as the institution's agent in verifying enrollment when a student applies for products, services, or employment contingent upon student status.
- Helps ensure students don't experience delays in verifying enrollment for housing, credit applications, student discounts and more.

### How EnrollmentVerify Works

Institutions should refer requestors to the EnrollmentVerify website, [www.enrollmentverify.org](http://www.enrollmentverify.org), where verification requests can be performed 24/7. An instant review is run against the Clearinghouse database to determine if we can find reported enrollment for the student. If so, an enrollment confirmation is immediately provided back to the requestor. If enrollment is not found, the requestor is advised we are unable to confirm enrollment and the requestor is instructed to contact the student. The student would reach out to their school to review why enrollment cannot be found with the Clearinghouse.

### Things to Know About EnrollmentVerify

- **No Additional Effort Needed** – All EnrollmentVerify verifications are performed using the enrollment data an institution provides to the Clearinghouse as part of the Enrollment Reporting service. No additional data or programming is required.
- **Directory Information Only** – Only enrollment information an institution designates as directory information is provided to requestors.
- **FERPA Compliant** – EnrollmentVerify is fully compliant with FERPA, and the Clearinghouse respects the policies governing release of student data to third parties for all participating institutions. The latest encryption technologies are used, and an audit trail of all verification requests can be viewed by school users in the Clearinghouse secure website.
